Have you completed all the tasks you planned for Stage 3 of your project?

Yes, this time, I was able finish all of the tasks I put out for myself. My tasks were to create low, medium & high fidelity prototypes. I was able finish these tasks on time since, I already had a plan on how the design will look like and what functions it will have. Also as I have experience with Figma program that made it easier as well. And of course, I had to face some new problems which took some time to solve, but I managed to finish on time.

How will you ensure you will complete your project on time?

Since, I have finished the whole design with which I am satisfied and after getting some feedback from my peers and friends and after spending a bit more time on it I will amke it look far better. Now, the next task is to write my medium article for this assignment. I will get started on the article and will have plenty of time to finish the final prototype and the article.
