EXT. DRIVEWAY - AFTERNOON

We open on a frontside RACING CAR that looks like red FERRARI. It's not moving, but we hear car roaring sounds coming from the car.

We stay on the car for few seconds and camera slowly zooms out to to show that the Ferrari is actually a toy car and there's another racing car just like that beside it. It looks like they're about to race.

As soon as the camera zooms all the way out, we see that it's a driveway of a house and we also some of the house as well. Then, both cars starting racing towards the house.

Then, we cut to the KIDS who ages between 5 - 8 who operating TWO REMOTE CONTROL each of the cars that are racing. We see the kids are laughing and giggling and having fun racing the REMOTE CONTROL CARS.

KID 1  
This is lot of fun.

We cut back & forth between remote control & cars to show cars' movement.
