

## **Reflection Questions**

### **Have you completed all the tasks you planned for Stage 2 of your project?**

Yes, I have completed all the tasks I planned for stage 2. But, I agree that I may have rushed through some of the tasks as I left them until the last minute. Despite this, all the tasks are now complete. By going through this process, I have gained a clear idea of how my app will function, and I've also gained some design ideas. Hopefully, with the completion of these pre-production and ideation tasks, the user experience (UX) of the app will be better.

### **How will you ensure to keep up continual progress on your project to complete it in time?**

After learning from last-minute experiences, I plan to start designing the app in Figma earlier. Knowing app design takes time, I'll break it into smaller tasks to ensure I cover all the necessary elements needed for the app.
