Peer Feedback Activity [Stage 2]

Monday, February 12, 2024   9:58 AM

Use the following template for the Peer Feedback Activity for Stage 2 of your projects.

Once you have shown your work to your peers, ask the following questions and write ideas and responses from your peers.

List your peers' names you met with for feedback (at least 2 for this assignment):

- Karthik

Clarity of Communication
- How well did I communicate my project progress and present my pre-production work?
  - You communicated your progress well and your pre-production work is also good.
- Was anything unclear?
  - Everything was clear
- How could my communication of pre-production work be improved?
- Maybe doing more ideation work.

Visual Pre-Production Elements
- How effectively do the visual pre-production elements (sketches, designs, moodboards, wireframes, storyboards, etc.) convey the project's concept and direction?
  - I'd suggest looking into other sites for inspiration since I find that very helpful in my designs. The user flow looks very good as well, the flow seems to be concise
- How could the visual elements be improved?
  - For the logo I'd try changing the font or the colour of the font because it won't be easy to read with the orange being on top of the red.

Structure and Organization
- How well does my pre-production work tell the project's story or present its structure?
  - The project seems to be clear thanks to the pre production work
- How do you recommend I improve the flow or organization of the project?
  - Id suggest sticking to your plan and completing the tasks accordingly

Planning and Timelines for Production
- Does my pre-production work feel substantial enough to transition into the production stage?
  - Yes, the sketches are a good foundation for the wireframe (assuming that is part of the next stage)
- If you were to take over my project with the pre-production work I've done, would you be able to complete the remainder of the project in the given timeframe?
  - Yes
- Any recommendations for refining timelines, milestones, or planning considerations moving forward?
  - No just continue what you're doing and you should be able to complete all the tasks

Additional Comments
- Any additional feedback on what worked, didn't work, or what could be improved for my project moving forward?
  - No, just continue doing doing what you're doing

Include a picture of you and your peers below to prove you met with one another (either a selfie in person or a screenshot of an online meeting):
